ECOLOGICAL MODELLING

Contents of *Ecological Modelling*, Vol. 95

VOL. 95 NO. 1 — 1 FEBRUARY 1997

An informational synthesis of ecosystem structure and function
R.E. Ulanowicz and L.G. Abarca-Arenas (Solomons, MD, USA) 1
Limiting similarity for coexistence of lake herring (*Coregonus artedii*) and chubs (*Coregonus hoyi*)
A.L. Jensen (Ann Arbor, MI, USA) 11
Preliminary evaluation of sampling strategies to estimate the species richness of diurnal, terrestrial birds using Monte Carlo simulation
H.M. Neave, R.B. Cunningham, T.W. Norton and H.A. Nix (Canberra, ACT, Australia) 17
Prey patchiness and larval fish growth and survival: inferences from an individual-based model
B.H. Letcher and J.A. Rice (Raleigh, NC, USA) 29
Ideal free distribution of copepods under predation risk
J. Giske, R. Rosland, J. Berntsen and Fiksen (Bergen, Norway) 45
Is parasitism a missing ingredient in model ecosystems?
S. Morand (Perpignan, France) and E. Arias Gonzalez (Merida, Mexico) 61
Temperature effects on stocks and stability of a phytoplankton–zooplankton model and the dependence on light and nutrients
J. Norberg (Stockholm, Sweden) and D. DeAngelis (Knoxville, TN, USA) 75
Use of power index and two-phase density approach to study fine root dynamics
H.-i. Wu (College Station, TX, USA), T.J. Hatton (Canberra, ACT, Australia) and R.L. Stoker (College Station, TX, USA) 87
Using machine learning techniques in the construction of models. II. Data analysis with rule induction
S. Džeroski, J. Grbović (Ljubljana, Slovenia), W.J. Walley (Stafford, UK) and B. Kompare (Ljubljana, Slovenia) . 95
Contemporary variations of terrestrial net primary production: The use of satellite data in the light of an extremal principle
G.A. Alexandrov and T. Oikawa (Tsukuba, Japan) 113

VOL. 95 NOS. 2,3 — 14 FEBRUARY 1997

Long-term foraging optimization in northern shovelers
P.J. DuBowy (College Station, TX, USA) 119
The reduced model of self-oscillating dynamics in an anaerobic system with sulfate-reduction
A.O. Fomichev (Dolgoprudny, Moscow region, Russia) and V.A. Vavilin (Moscow, Russia) 133
Modelling the effect of spatial scale and correlated fire disturbances on forest age distribution
D. Boychuk (Ajax, Ont., Canada), A.H. Perera, M.T. Ter-Mikaelian (Sault Ste. Marie, Ont., Canada), D.L. Martell (Toronto, Ont., Canada) and C. Li (Sault Ste. Marie, Ont., Canada) 145
Comparative study of flow-indices in lake-ecosystems and the implication for maturation process
I. Aoki (Hamamatsu, Japan) 165
A simulation study of the spatio-temporal dynamics of the unionid mussels
H.L. Lee (Knoxville, TN, USA) and D.L. DeAngelis (Coral Gables, FL, USA) 171

An analysis of the form of density dependence in a simulation model of a seasonal breeder undergoing control
G.C. Smith (Worplesdon, UK) 181
A physiologically-based model of a self-motivated hare in relation to its ecology
M. Rizzotto and S. Focardi (Ozzano dell' Emilia, Italy) 191
A forest soil vegetation atmosphere model (ForSVA), I: Concepts
P.A. Arp (Fredericton, New Brunswick, Canada) and T. Oja (Tartu, Estonia) 211
A forest soil vegetation atmosphere model (ForSVA), II: Application to northern tolerant hardwoods
T. Oja (Tartu, Estonia) and P.A. Arp (Fredericton, New Brunswick, Canada) 225
A process-based, terrestrial biosphere model of ecosystem dynamics (Hybrid v3.0)
A.D. Friend, A.K. Stevens (Midlothian, UK), R.G. Knox (Greenbelt, MD, USA) and M.G.R. Cannell (Midlothian, UK) 249
On the usefulness of overparameterized ecological models
P. Reichert and M. Omlin (Dübendorf, Switzerland) 289
Residence time of matter and energy in econetworks at steady state
B.-P. Han (Guangzhou, PR China) 301
Period 'bubbling' in simple ecological models: Pattern and chaos formation in a quartic model
J. Vandermeer (Ann Arbor, MI, USA) 311
The interaction of spatial scale and predator–prey functional response
T.W. Blaine (Providence, RI, USA) and D.L. DeAngelis (Coral Gables, FL, USA) 319
